COMPACT MODEL **S4**

# POSTMIX - PROBABLY THE MOST REASONABLE BEVERAGE SYSTEM IN THE WORLD

YOU CAN CHOOSE OUT OF 7 SYRUPS.

Mixed with water, cooled by the dispenser and ready to drink with a simple push of the button – that is pure efficiency.

Bottles, empty containers and a full stock – a thing of the past! The future is a small and compact dispenser – either with a water connection or a water tank – that can be filled with up to 3 Bag-in-Boxes (3 litres each). Eco-friendly with a small ecological footprint – minus 90% – extremely energy efficient. The Bag-in-Boxes are best before 9 month after production and produce 32 litres of ready-to-drink softdrink each. Freshly filled up you can utilize approx. 90 litres of softdrinks and water.

**THIS IS  
AN ECO-FRIENDLY  
BUSINESS**

*We focus on sustainability  
and climate protection and  
offer Grapos Softdrinks*
